Nakon ulaska Republike Hrvatske u Europsku uniju, gotovo sva istraživanja kvalitete demokracije, pokazuju da demokracija u Hrvatskoj stagnira ili slabi. To se nazadovanje u demokratskom karakteru države ne očituje toliko u kršenju temeljnih demokratskih prava, koliko u manipuliranju, nekorektnom interpretiranju ili marginaliziranju procedura, institucija, aktera i aktivnosti koje u demokratskom sustavu postoje kako bi se kontroliralo one koji imaju moć.

Cilj ovog skupa je, kroz razgovor sa svim relevantnim dionicima iznaći rješenja koja mogu zaustaviti demokratsko nazadovanje Hrvatske i ojačati demokratske mehanizme unutar političkog sustava.

After the accession of the Republic of Croatia to the European Union, almost all research on the quality of democracy shows that democracy in Croatia is stagnating or weakening. This decline in the democratic character of the state is not so much manifested in the violation of fundamental democratic rights, as in the manipulation, incorrect interpretation or marginalization of procedures, institutions, actors and activities that exist in the democratic system in order to control those who have the power.

The goal of this round table is, through discussions with all relevant stakeholders to find solutions that can stop Croatia's democratic decline and strengthen democratic mechanisms within the political system.
